Summary

Artificial Intelligence and Data Science undergraduate with strong expertise in Python, machine learning, statistics, and full-stack development. Experienced in data preprocessing, exploratory data analysis, and building scalable applications. Skilled in applying data-driven approaches to real-world problems including recommendation systems and fraud detection.

Experience

RepCard Private Limited, Gurugram

June 2025 – July 2025

Engineering Intern

- Worked on development tasks and applied programming concepts in real-world projects
- Collaborated with team members to design and implement efficient solutions

Projects

Behavioral Fraud Awareness & Simulation Platform

GitHub

- Built an interactive platform simulating real-world cyber fraud scenarios
- Implemented CNN-based deep learning models (XceptionNet) to classify scams
- Designed an assistant module to enhance user awareness and fraud prevention
- Conducted research on cyber fraud, deepfake analysis, and machine learning-based detection techniques to enhance awareness and prevention mechanisms

College Marketplace with ML-Based Recommendation System

GitHub

- Developed a peer-to-peer resale platform for student transactions
- Designed and implemented a recommendation system using user interaction and behavioral data
- Applied data preprocessing, feature engineering, and machine learning techniques to improve product discovery

Employee Goal Management Portal

- Developed a MERN-based Employee Goal Management Portal to streamline goal setting, approval workflows, performance tracking, and reporting
- Implemented JWT-based authentication and role-based access control for Employees, Managers, and Admins
- Built RESTful APIs for goal management, team approvals, user administration, audit logging, and CSV/Excel report exports
- Designed MongoDB data models using Mongoose and deployed the application with automated build pipelines

GROWNET Trust-Based Community Platform

- Designed a scalable platform with trust scoring, SOS alerts, and recommendation features
- Focused on secure and reliable community interaction using data-driven mechanisms

Technical Expertise & Machine Learning

- Strong foundation in Machine Learning including feature selection, model building, and performance evaluation
- Strong understanding of statistical concepts including hypothesis testing, probability distributions, and model evaluation
- Familiar with regression, classification, clustering, and neural network models
- Hands-on experience in end-to-end ML pipelines from data preparation to evaluation
- Experience with deep learning models (CNNs, XceptionNet)
- Familiar with Computer Vision and basic NLP applications

Research

Behavioral Fraud Awareness & Simulation Platform Research

- Authored and presented a conference paper on cyber fraud detection, deepfake analysis, and machine learning-based scam classification
- Conducted literature review on fraud detection algorithms, cybersecurity regulations, and emerging ML-based security solutions

Education

Jaypee University of Information Technology

2023 – 2027

B.Tech in Computer Science Engineering (AI & Data Science)

Certifications

- Functional Data Structures and Algorithms
- Deloitte Data Analytics Virtual Experience Program
- Agentic AI and Generative AI applications

Tools & Technologies

Programming: Python, SQL, C++, JavaScript, C

Data Science Libraries: NumPy, Pandas, Matplotlib, Scikit-learn

Machine Learning: Scikit-Learn, Regression, Classification, Clustering, Neural Networks, Recommendation Systems, Computer Vision, Model Evaluation, Feature Engineering

Deep Learning: TensorFlow, PyTorch, PySpark, CNNs, XceptionNet

Data Visualization: Power BI, Matplotlib, Tableau

Development Tools: Jupyter Notebook, Google Colab, VS Code

Databases: MongoDB

Version Control: Git, GitHub **AI Tools :** ChatGPT, Claude, GitHub Copilot, Cursor

Professional Skills

Strong analytical thinking and problem-solving abilities Effective technical communication and stakeholder collaboration Teamwork, adaptability, and leadership in project development Ability to interpret data-driven insights for decision making

Languages

English (Fluent), Hindi (Advanced)
